

## **RAPID DEFOAM G45™**

DRILLING MUD DEFOAMER

### **Description:**

Rapid Defoam G45™ is a extremely effective and economical defoamer in drilling mud systems. It is highly effective defoamer for fresh and sea water drilling muds, for brine / HEC fluids and calcium muds. Rapid Defoam G45™ has a pumpable characteristic of an oil base fluid and is an effective defoamer over a pH range of 2.0 to 11.

### **TYPICAL PHYSICAL PROPERTIES:**

Appearance	Clear Fluid
Specific Gravity	0.97
Density, lbs./gal.	8.0 to 8.1 (typical)
Flash Point	400° F (PMCC)
Solubility	Water Insoluble

### **Application:**

Rapid Defoam G45™ is used at a level of 0.2 to 0.5 ppb in water based mud systems. The product shows good dispersibility in brine fluids and calcium muds.

### **Packaging, Storage and Handling**

Rapid Defoam G45™ is delivered in 55-gallon drums and 5-gallon pails. It should be protected from freezing in transit and storage.
